Version Control

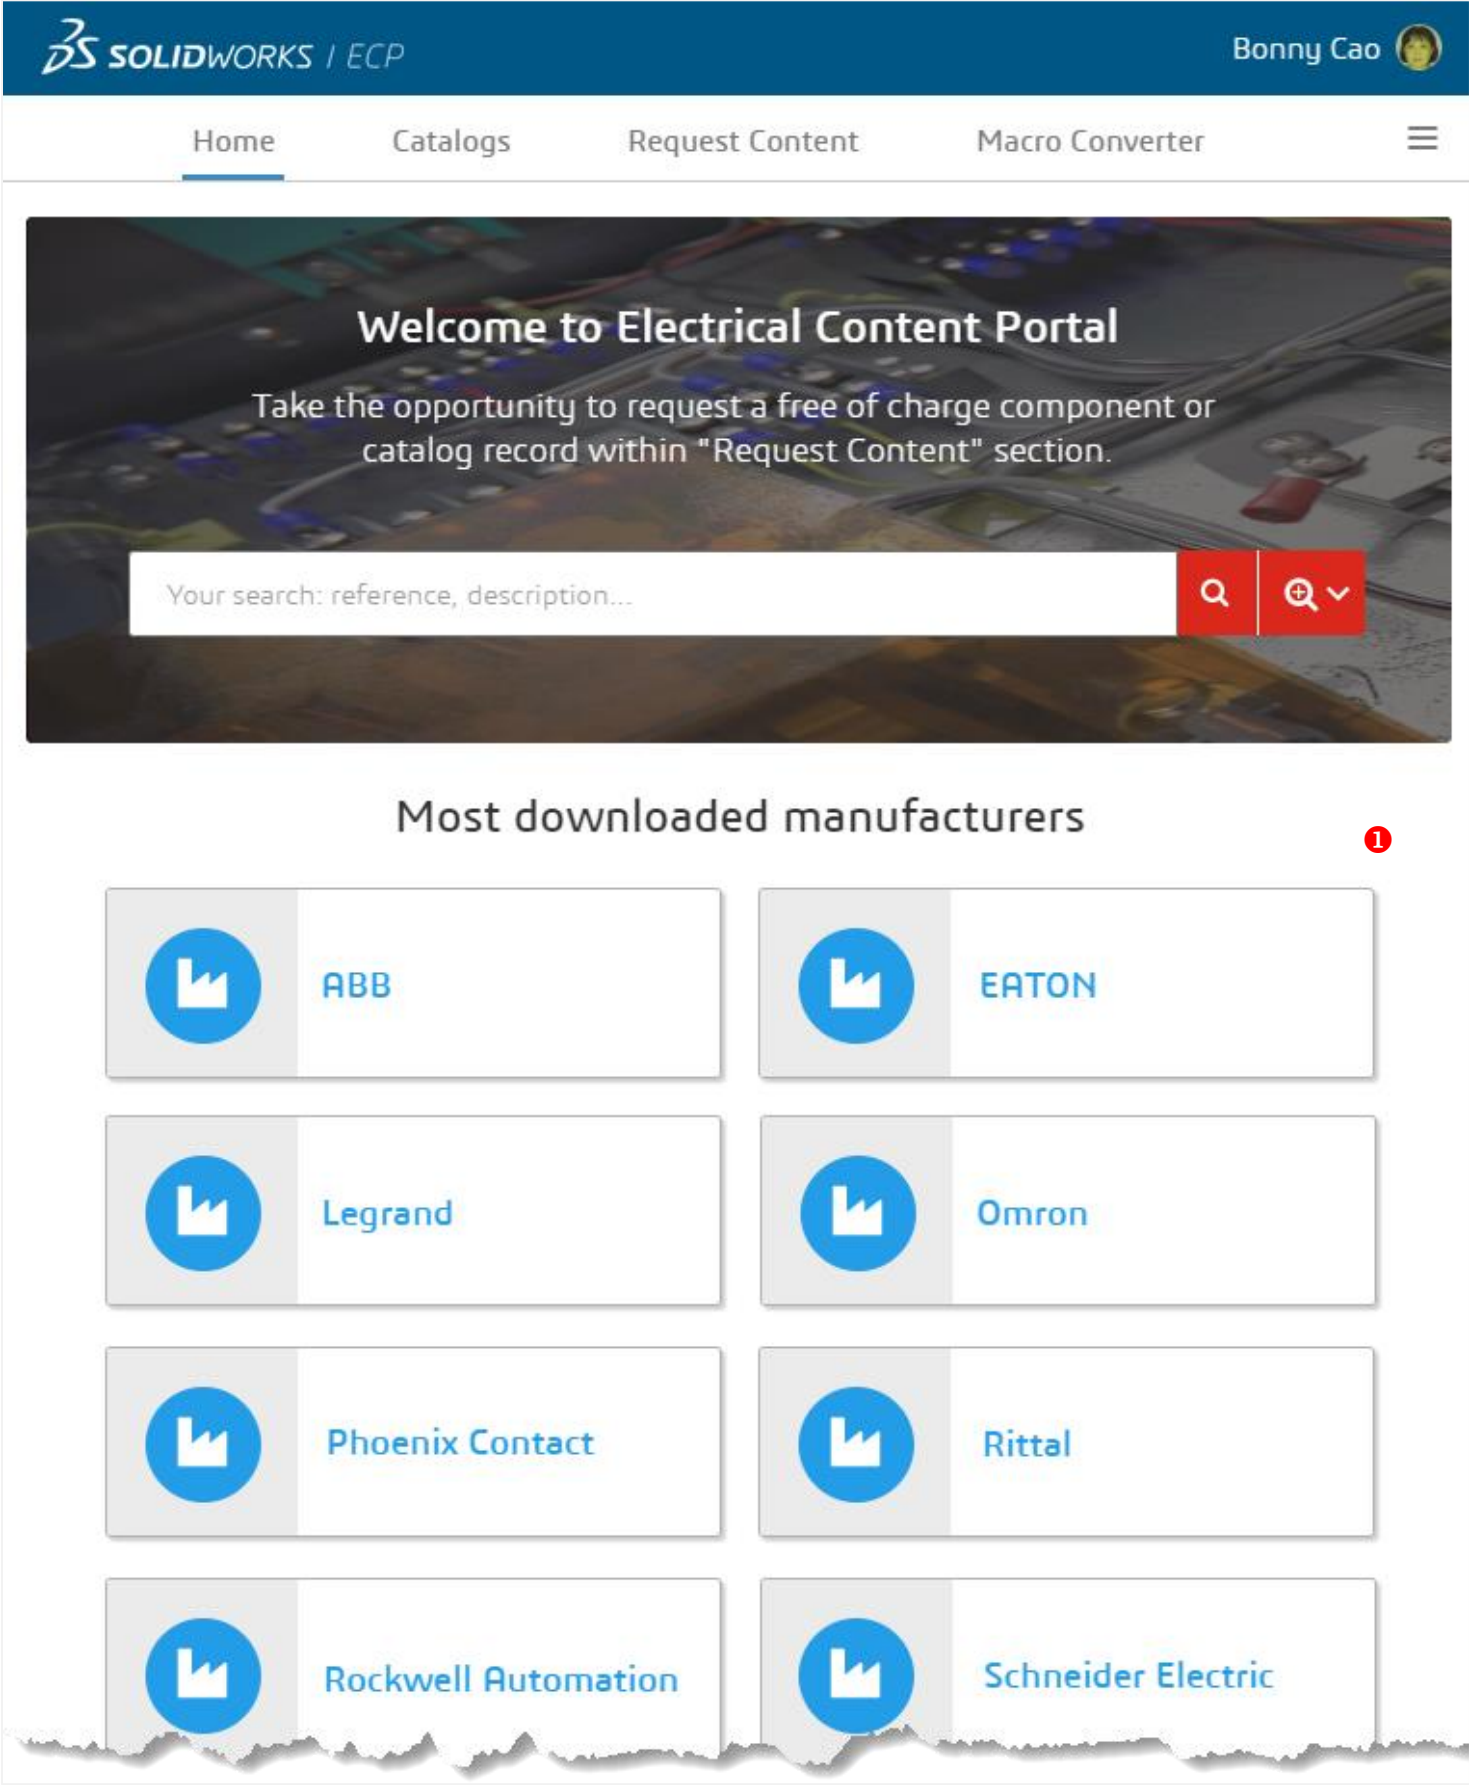

Version	Author	Date	Comment
1	Bonny Cao	03/26/2020	Initial Draft Version

 All CSS information is just for reference, and the developer can change or customized them as per development needs. See the Common UI Spec for the specification of header, footer and search.

1. Large Screen or screen size

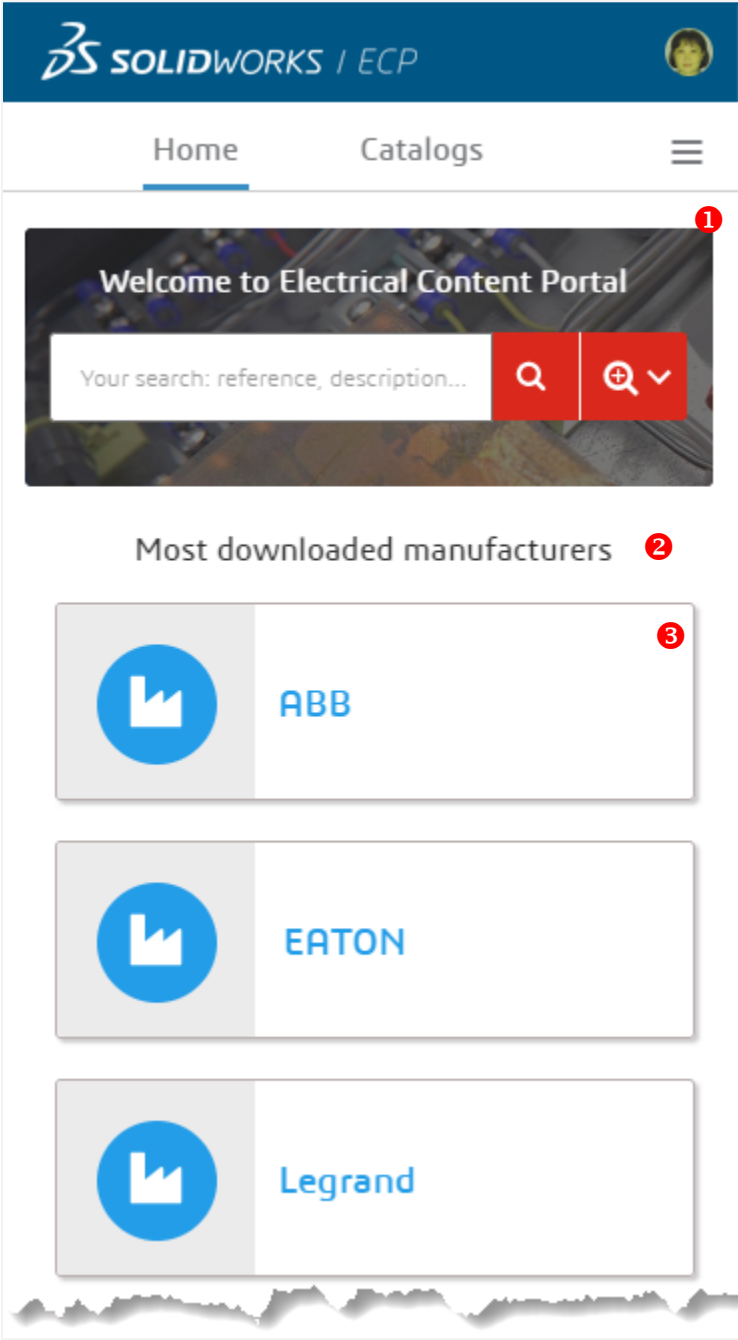

UI Specification and CSS Styling Reference	
❶	Top banner: Banner image covered with a filter layer in dark gray (#333) at opacity of 60%; Headline on the banner image: 3DSRegular, 32px, #fff; message text: 3DSLigh, 20px #fff, align: center. The banner height can be controlled and the padding.
❷	Section Title: 3DSRegular, 24px #333
❸	Card: 4 flex shadowed boxes equally width in the content container, spacing 15-20px; border: 1px solid #BAAFAF; border-radius: 3px; Icon block background: #EBEBEB, icon circle: 60x60px with radius: 39-40px; icon: font-awesome (fa-industry), size: 33x33, color: fff. Manufacturer name: 3DSRegular, 19px, #239de8.

UI Specification and CSS Styling Reference
Cards: Change the cards display 2 by 2 in each row.

Small Phone Screen (e.g. iPhone Portrait)

UI Specification and CSS Styling Reference	
❶	Top banner: Headline on the banner image: change the headline text to smaller font size: 16px. Hide the message text since the related “Request Content” menu item is hidden.
❷	Section Title: Change the font to smaller size to 16px.
❸	Card: Change the card view 1 by 1
